Avinash Neralakatte

Full-Stack Engineer — FastAPI · Next.js · PostgreSQL

Kochi, India · +91 9611670779 · avinashpoojary651@gmail.com · linkedin.com/in/avinash-n-dev · github.com/avi9611 · avi9611.github.io

SUMMARY

Full-stack engineer building production CRM, ERP and hospital systems on FastAPI and Next.js. **Eight client products shipped** at a delivery consultancy, across healthcare, hospitality, construction and calibration. Put together two of the internal standards new projects now start from: a **Next.js frontend template** and a **backend conventions kit**.

EXPERIENCE

Full-Stack Engineer — Hybrid Interactive Consultancy LLP

DEC 2025 – PRESENT

Kochi, India

- **Lead developer on a lead-to-cash CRM for a UAE medical-equipment calibration laboratory** — 18 modules across sales, work orders, instruments, inventory, procurement, HRM, certificates and audit. Delivered to contractual SLA and performance targets.
- Designed the **multi-branch tenancy model** so every purchase order, work log and quotation carries its issuing branch's identity, backed by an append-only audit trail and a snapshot that freezes counterparty details onto issued documents.
- Shipped **eight production products** with the team across healthcare, hospitality, construction, calibration, sales and HR — two hospital management systems, a service marketplace, a construction CRM, a sales CRM and an HRM platform — on FastAPI, async SQLAlchemy, PostgreSQL, Redis, Celery, Docker and Next.js.
- **Built the company's Next.js frontend template**: BFF cookie authentication, RBAC, TanStack Query and a Vitest/Playwright suite across 143 files, documented in 17 rule guides. Helped design the FastAPI backend template.
- Wrote the **backend conventions kit** new projects start from — 30 concern guides on permissions, migrations, caching, tenancy, timezones and money handling, plus a checker that fails the commit when documentation drifts from the code.

Software Engineer Intern — PurpleMerit

SEP 2025 – NOV 2025

- Built and shipped features for a social-media application, working across both frontend delivery and backend API work.

Software Developer Intern — GRID R&D

MAY 2025 – AUG 2025

- Built AI video-interview functionality for **Visume**, a live hiring platform where candidates record video answers and the system scores their technical responses.
- Worked across the MERN stack with MySQL, Prisma and AWS S3, implementing authentication, authorization and file storage for candidate and employer data.

Java Full-Stack Developer Intern — Kodnest, Bangalore

JAN 2024 – APR 2024

Java, Spring Boot, Hibernate and MySQL — REST APIs, authentication flows and unit testing with JUnit.

SELECTED PERSONAL WORK

Nadisa Solutions — nadisasolutions.com

2026

- Live career-guidance platform for chemistry professionals, built solo. Next.js 16 and React 19 with Firebase Firestore, Auth and Storage powering a blog, job board, contact workflows and a secure admin dashboard, shipped with JSON-LD, sitemap generation and Core Web Vitals monitoring.

TECHNICAL SKILLS

LANGUAGES	Python, TypeScript, JavaScript, SQL, Java
BACKEND	FastAPI, async SQLAlchemy 2.0, Pydantic, Celery, Alembic, REST API design, JWT and RBAC, modular monolith architecture
FRONTEND	Next.js App Router, React 19, TanStack Query, Zustand, Tailwind CSS, React Hook Form with Zod, shadcn/ui
INFRA & QUALITY	PostgreSQL, Redis, MongoDB, Docker and Compose, S3-compatible storage, AWS, DigitalOcean, Azure, pytest, Vitest, Playwright, Prometheus, structured logging
AI	LLM product integration, Pydantic AI, RAG pipelines, agentic development with Claude Code, Codex and Copilot

EDUCATION

Master of Computer Applications — Visvesvaraya Technological University, Srinivas Institute of Technology, Mangalore — CGPA 8.85 · 2022–2024

BSc Mathematics — Mangalore University, Bhandarkars Arts and Science College, Kundapura — 2017–2019

Microsoft Certified: Azure Fundamentals — Microsoft — 2024
